Demo company · entirely fictional

Northwind Logistics

PE-backed UK contract logistics. Closing March, which is also the year end.

£42.2m	£4.4m	290	120	3
revenue, FY26	EBITDA, FY26	people	leased HGVs	distribution centres

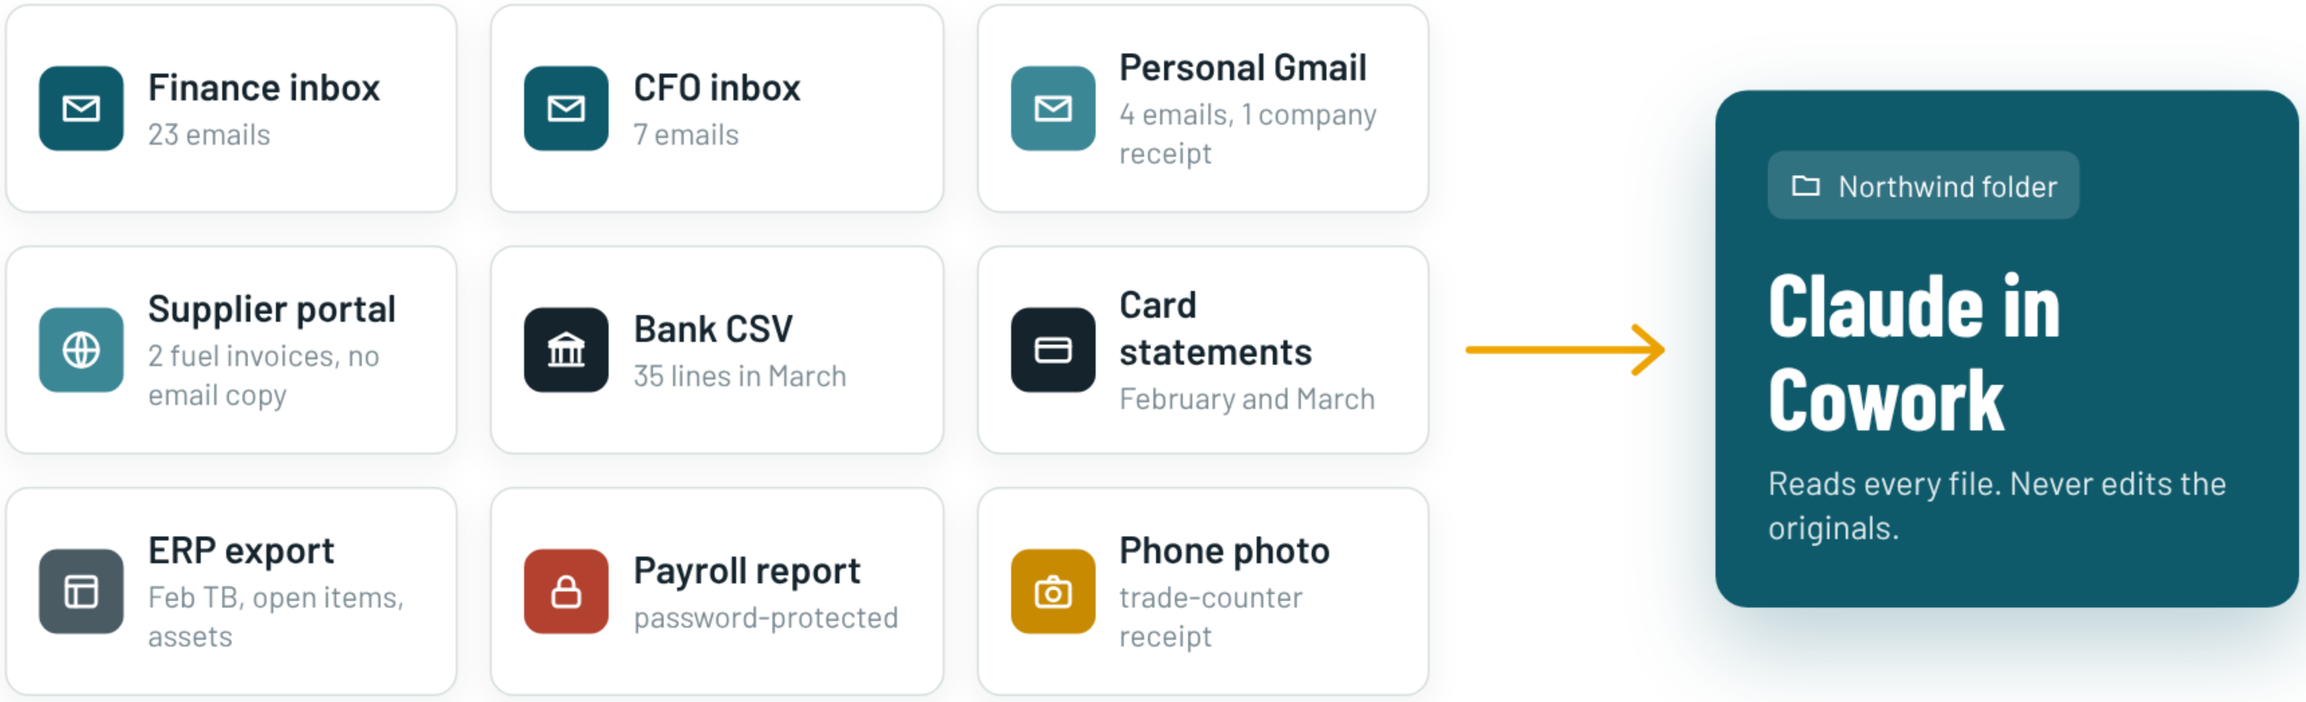

Sponsor Fernleigh Capital Partners

Debt £12m senior term loan

Covenant 3.0x net debt / EBITDA

The inputs

One folder, exactly as the documents arrive. Nothing cleaned up first.

Ten prompts, one session

41 minutes from the first prompt to the auditor pack. Claude asks; the CFO decides.

1. **Scope and set up** CFO CALL
   8 kinds of source read; payroll password requested
2. **Collect and file**
   50 documents registered, 27 filed by supplier
3. **Find missing documents**
   49 statement lines matched; 1 invoice requested
4. **Build the ledger** CFO CALL
   74 March entries, each linked to its document
5. **Reconcile**
   77 balance checks, no differences
6. **Judgement calls** CFO CALL
   19 items, answered in one message
7. **Year-end journals**
   4 journals, with workings
8. **EBITDA adjustments** CFO CALL
   6 found in invoice lines; 4 approved
9. **Reports and Excel pack**
   TB, P&L, balance sheet, cash flow, dashboard
10. **Handover**
    Pack for the auditor and tax adviser

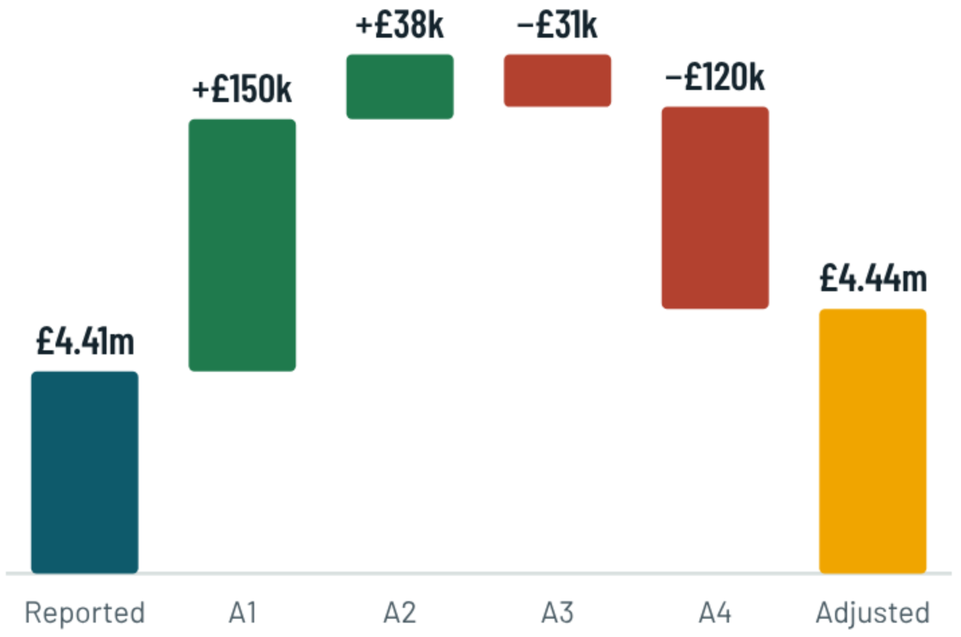

The output

Matched an answer key built before the documents, on all 45 accounts, to the penny.

£0.00
trial balance difference against the answer key

£4.44m
Adjusted EBITDA: +£37k, each item traced to an invoice line

1.93x
net debt / Adjusted EBITDA, against a 3.0x covenant

Axis starts above zero so the adjustments are visible.

Board dashboard · Excel close pack · Auditor handover pack · General ledger
